

# Bright Yellow Daylily

Actual photo of parent stock. 5 inch intense blooms start in April/May and repeat over the summer.

This compact ever-blooming daylily produces a continuous profusion of beautiful, medium-sized, bright yellow flowers. Supplies a seemingly endless source of warm season color for beds, borders, and containers. An herbaceous perennial; may remain evergreen in mild winter areas.

USDA Zone: 4-11

Light Needs: Full sun

Water Needs: Once established, water occasionally; more in extreme heat or containers.

Foliage dies back with frost and reappears in February. Offsets quickly and roots from the flower stem.
